

Your Assurance of Purity & Peace of Mind

Presenting our new range of innovative water storage tanks

Built-in antibacterial protection • Heavy-metal free • Certified as per European standards

PROTECTED WITH
MICROBAN[®]

SAFEGUARDING YOUR WATER TANK FROM THE DANGERS YOU CAN'T SEE

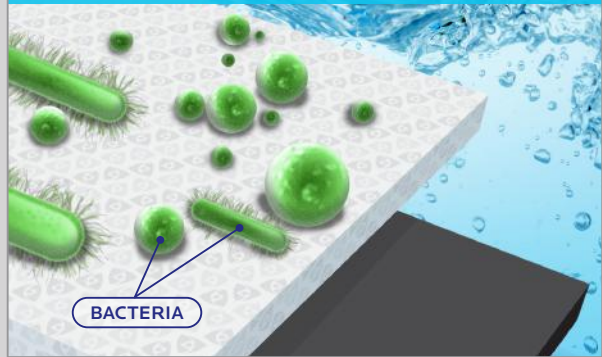

Built-In Antibacterial Product Protection

The Ganga range has been developed in collaboration with Microban International, the world's leading authority in antibacterial product protection. Integrated at the stage of manufacture, Microban® SilverShield® technology works 24/7 to inhibit the growth of bacteria on the inner layer of the tank.

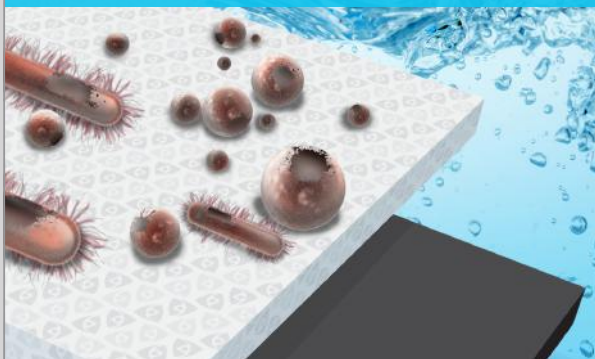

01. FULL INTEGRATION - The technology is integrated into the tank during manufacture and becomes part of the molecular structure of the plastic inner layer. It will not wash off or wear away.

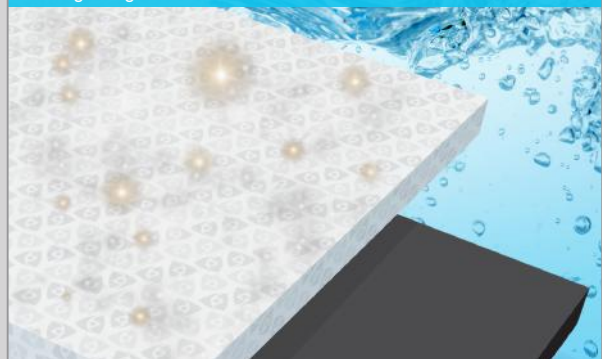

02. CONTAMINATION - The treated inner layer becomes contaminated with bacteria as a result of cleaning lapses and/or environmental conditions.

03. TECHNOLOGY AT WORK - The technology penetrates the bacteria and inhibits their ability to reproduce, make food or eliminate waste.

04. A CLEANER TANK - Ultimately the treated inner layer of the tank remains cleaner and is protected against the proliferation of harmful and degrading bacteria.

KEY BENEFITS

Broad Spectrum Performance

Microban® technology has been proven effective against an array of bacteria, including *E. coli*, *S. aureus* and *Legionella*.

Hygienic Protection In-Between Cleaning

Microban® technology improves product cleanliness and offers an added level of protection in-between routine cleaning.

Minimised Staining & Bad Odours

Microban® technology works to inhibit the growth of odour-causing and staining bacteria on the treated inner-layer of the tank.

Reduced Risk of Cross Contamination

Microban® technology helps to maintain the purity of water stored in the tank by minimising the risk of bacterial cross contamination.

Increased Durability

Microban® technology actively combats the growth of bacteria that can prematurely degrade the plastic tank.

Certified Safety

The Microban® SilverShield® technology utilised in Ganga tanks has a long history of safe use and is notified with the EU Biocidal Products Regulation (BPR). It is also non-leaching and approved for use in food-contact articles.

Ganga Health

The new Ganga Health water storage tank has been designed to help you worry less and enjoy life more. The tank is free from hazardous heavy metal, which keeps water safe for human consumption. It also features built-in antibacterial product protection. Ideal for household and industrial applications.

SALIENT FEATURES

The inner layer is enhanced with Microban® antibacterial technology, helping to eliminate bacterial growth by up to 99.9%.

Intermittent black colour UV Sun-Shield layer protects it from harmful UV rays.

Outer high-quality Titanium loaded layer gives strength and whiteness to the tank.

Free from hazardous heavy metals as per the European standards, which makes water safe for drinking purposes.

THE TANK IS MADE UP OF 3 LAYERS, EACH ONE SERVING A VERY SPECIFIC PURPOSE:

- White colour Titanium loaded layer (Outer layer)
- Black colour UV Sun-Shield layer (Third layer)
- White colour layer infused with antibacterial technology (Inner layer)

THIS WATER TANK IS PROTECTED WITH MICROBAN® TECHNOLOGY

MICROBAN® IS PROVEN TO ELIMINATE BACTERIA BY UP TO 99.9%

PROTECTION THAT LIVES ON
MICROBAN®

Ganga COOL

The Ganga Cool water storage tank has been designed to maintain the purity, hygiene and coolness of your water. Ideal for household and industrial applications

SALIENT FEATURES

The inner layer is enhanced with Microban® antimicrobial technology, helping to eliminate bacterial growth by up to 99.9%.

Intermittent foam layer keeps water resistant from external temperature variation, even under extreme conditions.

Intermittent black colour UV Sun-Shield layer protects it from harmful UV rays.

Outer high-quality Titanium loaded layer gives strength and whiteness to the tank.

Free from hazardous heavy metals as per European standards, which makes the water safe for drinking purposes.

THE TANK IS MADE UP OF 4 LAYERS, EACH ONE SERVING A VERY SPECIFIC PURPOSE:

- White colour Titanium loaded layer (Outer layer)
- Black Colour UV Sun-Shield layer (Second layer)
- Foam layer (Third layer)
- White colour layer infused with antibacterial technology (Inner layer)

Ganga GRANITO

The Ganga Granito water storage tank has a cutting-edge, attractive design. It comes in a granite-finish and is available in 2 different granite shades - red & white. Ideal for household applications.

SALIENT FEATURES

The inner layer is enhanced with Microban® antimicrobial technology, helping to eliminate bacterial growth by up to 99.9%.

Intermittent foam layer keeps water resistant from external temperature variation, even under extreme conditions.

Intermittent black colour UV Sun-Shield layer protects it from harmful UV rays.

The attractive outermost granite-finish layer enhances the beauty of your house.

THE TANK IS MADE UP OF 4 LAYERS, EACH ONE SERVING A VERY SPECIFIC PURPOSE:

- New granite finish layer (Outer layer)
- Foam layer (Second layer)
- Black colour UV Sun-Shield layer (Third layer)
- White colour layer infused with antibacterial technology (Inner layer)

THIS WATER TANK IS PROTECTED
WITH MICROBAN® TECHNOLOGY

MICROBAN® IS PROVEN TO
ELIMINATE BACTERIA BY UP TO **99.9%**

PROTECTION THAT LIVES ON
MICROBAN®

HEAVY-METAL FREE

Various pigments used in the making of tanks are extracted naturally and usually contain traces of hazardous heavy metals which are unsafe for human consumption. This makes water toxic and causes harm to the body. Therefore, our tanks have been certified as per Restriction of Hazardous Substance (RoHS) Directive (European Union) 2015/863 which ensures:

- Tanks are free of heavy metal, without compromising on the strength and durability of the tank
- Water is safe for drinking purposes
- Users have added peace of mind

STRONG & SOLID THREADED LIDS

All the tanks have a Rotational Moulded heavyweight threaded lid which prevents contamination of water from dust particles and pollution.

SPECIFICATIONS FOR ALL TANKS

Capacity (Litres)	Overall Diameter (mm)	Overall Height (mm)	Diameter Man-hole (mm)
550	870	960	420
750	1010	1025	420
1100	1110	1230	420
1500	1250	1340	420
2000	1360	1500	420
3000	1550	1853	380
5000	1865	2085	465
10000	2340	2655	465
